WHY DO WE NEED TO REPORT

Every time you report a side effect you are contributing to improve the safety of medicines and vaccines used by Filipinos.

Drugs and vaccines are registered to and evaluated by the FDA considering the quality of the products. However, no medicine is guaranteed 100% safe. Although they are carefully tested and evaluated, some side effects or adverse reactions may become evident only after the product is in use by the general population.

Your report may contribute to:

- the identification of previously unrecorded or unrecognized rare or serious side effect;
- changes in product safety information or labelling, or other regulatory actions such as product recall or removal from the market;
- international data regarding benefit, risk or effectiveness assessment of medicines and vaccines;

Regulatory actions are imposed by the FDA to secure the safety of the public. It also provide consumers and healthcare professionals guidance on the rational use of medicines and vaccines.
